

# Table of Contents

Executive Summary .....	3
Table of Contents .....	5
<b>Chapter 1: Transceiver Markets and Drivers</b> .....	8
The Growing Role of Optical Transceivers .....	8
Transceiver Markets and Trends .....	8
<b>Chapter 2: Drivers of Transceiver Product and Technology Development</b> .....	10
Bandwidth Drivers .....	10
Explosion of Content From Mobile Devices .....	10
High-Speed Broadband Deployment At the Network Edge .....	10
Changing Use of E-mail .....	11
Rich Web Site Content .....	11
Music Downloads .....	11
Video Downloads .....	11
The Internet Reaches Everywhere .....	11
Rising Internet Use in Asia .....	12
The Impact of Rapid Traffic Growth on the Network .....	12
Access network transformation .....	12
Broadband Drivers .....	13
Femtocells Set to Play Role in the Home .....	14
Fiber-to-the-X Market Status .....	14
WDM Will Play a Key Role in Next-Generation PON .....	16
CATV Access .....	20
The Optical Packet Transport Platform .....	21
OPT: Jury Is Still Out .....	22
Opposing Contenders to OPT .....	22
High-speed Optical Transmission in the Core Network .....	23
40-Gbps and 100-Gbps Market Drivers .....	24
40-Gbps and 100-Gbps Roadmaps .....	26
Optical Penetrates the Datacenter .....	27
Datacenter trends .....	27
Datacenter Architecture and the Impact on Transceivers .....	28
Networking Protocol Impact on Transceiver Requirements .....	29
Unified Datacenter Fabrics .....	30
10-Gbps Technology Begins to Reach the Server .....	31
Optics Battles with Copper for Supremacy at 10-Gbps and Beyond .....	32
The 10GbE Question .....	33
SFP+ Optical Modules .....	33
Active optical cables .....	33
10GBASE-T ICs .....	33
SFP+ Copper Cables .....	34
Consumer Applications .....	35
The Move to Even Higher Speeds .....	35

<b>Chapter 3: Transceiver Product Trends</b> .....	36
<b>Overall Product Trends</b> .....	36
Data Rates Continue to Rise .....	36
Form Factors Continue to Shrink .....	37
<b>Telecom Products</b> .....	38
10-Gbps Telecom Interfaces Move to Transceivers and to XFP .....	38
40-Gbps and 100-Gbps Interfaces .....	40
Client-Side 40-Gbps Interfaces .....	41
Line-Side 40-Gbps and 100-Gbps Interfaces Incorporate Innovative Modulation Schemes .....	42
Duo-binary .....	43
DPSK .....	43
DQPSK .....	44
Polarization Multiplexing Combined with Phased-Shift Keying .....	44
Contrarian Approaches to 40-Gbps .....	45
Infinera's Approach: Integrating PICs and Bandwidth Virtualization .....	45
Nortel Networks's Approach: Using Dual-Mode QPSK .....	46
OpVista's Approach: Employing 4x10-Gbps in a 50GHz Channel .....	47
WDM Continues to Thrive .....	48
<b>Datacom Optical Transceivers</b> .....	49
Migration to SFP+ .....	49
Fibre Channel Moves to 8-Gbps .....	51
Parallel Transceivers Find Their Sweet Spot .....	51
Ethernet and Fibre Channel Converge and Diverge .....	51
Parallel Transceiver Trends .....	51
Parallel Transceivers for 40-Gbps and 100-Gbps Short-Reach Implementations .....	52
Active Optical Cables .....	53
AOC Have Cost Advantages .....	53
AOC Deliver Compatibility with Copper Interfaces .....	54
<b>Chapter 4: Manufacturing Issues</b> .....	55
<b>Transitioning from Craftsmanship to High Volume</b> .....	55
<b>Manufacturing Cost Drivers</b> .....	57
Packaging .....	57
Testing .....	58
Reliability Testing .....	59
<b>The Role of Standards and Specifications</b> .....	60
<b>Design for Manufacture is Now Critical</b> .....	60
<b>Analog IC Design Moves In-House</b> .....	60
<b>Offshoring Enters a New Phase</b> .....	60
<b>Chapter 5: Optics and Electronics</b> .....	62
<b>Interfacing Optics and Electronics</b> .....	62
<b>LRM and SFP+ Blur the Electronics-Optics Boundary in Enterprise Networks</b> .....	62
LRM .....	62
SFP+ .....	64
<b>EDC Looks to Penetrate Telecom Applications</b> .....	65
<b>Future directions of electronics for longer reach telecom applications</b> .....	65

<b>Chapter 6: Optical Integration and Silicon Photonics</b> .....	66
<b>Moore’s Law Doesn’t Apply to Optical Integration</b> .....	66
<b>Defining Key Terms</b> .....	66
<b>Photonic integration challenges</b> .....	67
<b>Hybrid Integration Becomes a Key Photonic Tool</b> .....	68
<b>Integration Limitations</b> .....	68
<b>New Applications Drive Optical Integration</b> .....	70
<b>Reduced Cost per Transported Bit</b> .....	70
<b>System Density</b> .....	72
<b>Parallel Channel Designs</b> .....	73
<b>Silicon Photonics</b> .....	74
<b>Photonic Building Blocks in Silicon</b> .....	75
<b>Silicon Photonics Players</b> .....	76
<b>Silicon Photonics’ Market Evolution</b> .....	77
<b>Silicon Photonics Still Has Some Challenges to Overcome</b> .....	77
<b>Research Programs and Initiatives</b> .....	78
<b>Appendix: Transceivers and Optical Technologies Markets</b> .....	79
<b>Transceiver Forecast Summary</b> .....	79
<b>Derivative Forecast for Optical Transmitter and Receiver Technologies</b> .....	81
<b>Optical Transmitter Technologies</b> .....	81
<b>Optical Receiver Technologies</b> .....	84
