

## **Innovation has no boundaries!**

Grow your startup and gain visibility to kickstart your success. Join our open competition.

LightCounting is pleased to announce its International Startup Competition at the OptiNet China Conference in Beijing on June 20th. All startups developing new products or technologies for the optical communications market, including interconnects for datacenters and AI Clusters, are encouraged to apply.

LightCounting will select 7 finalists to present their stories in front of a panel of judges selected from top industry experts, and in front of an audience of many potential customers during the OptiNet China Conference.

“This is the second time LightCounting is organizing such an event at OptiNet China. The previous competition in 2023 was limited to Chinese startups, but we are breaking the geopolitical boundaries this year and inviting all startup companies to apply.” commented Dr. Vladimir G. Kozlov, CEO and Chief Analyst at LightCounting Market Research.

“Science and technology know no boundaries. The laws of physics are the same in China as they are in the USA, and everywhere else on planet Earth. Innovation will continue to defy borders and skeptics, as it has done for millennia. LightCounting is proud to facilitate this relentless progress.”

“The judges will select 3 winners, one each in the following three categories: best product, best technology and best business strategy. All seven finalists will be given access to LightCounting’s Research Notes for the rest of 2024.”

“The three winners will each also receive one of our reports for free, selecting the report which is the most relevant for their business.” Dr. Kozlov continued.

Interested companies should submit a brief company introduction to Jessie Li, [jessie@lightcounting.com](mailto:jessie@lightcounting.com) by May 31<sup>st</sup>. LightCounting will announce the 7 finalists on June 3<sup>rd</sup> 2024.

To join the competition or if you have any questions concerning it, please contact Jessie Li at [jessie@lightcounting.com](mailto:jessie@lightcounting.com) or call her at +86-139-7126-8862.
